

Press Release

Energy Risk Management is granted Investment Firm license by the Danish Financial Supervisory Authority.

Kolding, 14 May 2025. Since the company was established, the activities have expanded, and the primary focus is now on financial products and services within the energy sector. Therefore, becoming a licensed investment firm is a natural step – both to secure the company's long-term success and to demonstrate clearly to clients and partners that the company has the strength to meet all financial and administrative requirements set by the Danish Financial Supervisory Authority (FSA) in connection with energy and currency trading.

“Prior to the approval, we carried out months of work to ensure compliance with all the requirements for regulation under the FSA,” says the company's Head of Finance, Christian Lind Rathcke, and continues: “There are specific requirements for the company's policies, procedures, capital and liquidity, solvency, and a range of regulatory reporting obligations. Risk management is also a critical part of the criteria for being an investment firm. These are requirements we are happy to meet, as we know they strengthen our company in the long term,” concludes Christian.

Managing Director Hans Erik Hjulmand Christensen adds: “We are incredibly proud to announce that we have received approval from the Danish FSA as a licensed investment firm as it is a strong endorsement of our company and a key step in our long-term growth strategy. The approval marks an important milestone in our development and highlights our commitment to delivering professional and reliable financial services to our clients. As a young company, we have experienced significant growth in the number of customers and partners we collaborate with, and this regulatory approval substantially strengthens our position in the market. A big thank you to the entire team who worked hard to get us to this point. Now, we feel well-prepared for further growth and expanded activities,” concludes Hans Erik.

The company's new official name is Energy Risk Management Fondsmæglerselskab A/S, with the secondary name Energy Risk Management Investment Firm, as the company has a significant number of international activities.
